

SCHOONER REVIEW

Your Source for High Pressure Cleaning Equipment

Hotsy equipment has been used in countless applications for 40 years. Our power washers are recognized for having long life and excellent cleaning ability. We offer more than 100 industrial-grade pressure washers in many shapes, styles and sizes.

555SS - Hot Water Pressure Washer

The 500 Series delivers rugged, yet affordable, cleaning power for a broad range of applications, from agriculture to building maintenance. The sporty 555SS, with its stainless steel coil skin, is our most popular entry level hot water model.

- Oil-Fired Heater
- 2.2GPM @ 1300 PSI / Direct-drive pump
- ETL-Certified to UL-1776 safety standards
- 7-Yr Pump Warranty

790SS - Hot Water Pressure Washer

The 900 Series takes on the heaviest of industrial cleaning jobs. Oil-heated models come with a wheel kit for on-site portability. A pressure switch and rupture disc are standard features on all 900 Series models. Equipped with a 50' hose.

- Oil Fired
- 2.8 or 3.5 GPM@2000 PSI
- 208V or 230V, 1PH
- 1330 or 1490 RPM Belt Drive Pumps

895SS - Hot Water Pressure Washer

Introducing the newest addition to the Hotsy hot water pressure washer line - model 895SS. This is a powerful washer delivering cleaning power of 3.5 GPM at 3000 PSI. The pneumatic wheels make it easy to maneuver over gravel or rough terrain. The 8.2 HP electric motor runs a belt-driven Hotsy triplex pump with 7-year warranty.

- Oil-Fired
- 3.5 GPM at 3000 PSI
- 8.2 HP
- Electric Powered

965SS - Hot Water Pressure Washer

The Gas Engine Series consist of the most compact and portable hot water pressure washers on the market. Powered by reliable gasoline engines, all you need is water and you can clean anywhere anytime. All models (except 781SS) are backed by Hotsy's 7-year pump warranty and all are ETL safety certified.

- Oil-Fired
- 2.7 to 3.8 GPM @2400 to 3500 PSI
- 7 to 13 HP
- 12 Volt DC
- 2 Electric-Start Model
- 5 Battery-less Models

1075BE - Hot Water Pressure Washer

The Belt-Drive Gas Engine Series Hot Water Pressure Washers are available in 9, 13 or 16 HP. This series is the most versatile in the Hotsy hot water pressure washer line up for mobility options. The chassis is available with different wheel kits, as well as trailer mount or skid varieties for easy portability.

- Oil-Fired
- 3.0 to 4.6 GPM @ 30_
- 3000 to 3500 PSI
- 9 to 16 HP
- 12 Volt DC
- 2 Battery-less Models
- 2 Electric-Start Models

1. WELDED FRAMES Hotsy frames are welded. They hold up to vibration and are stronger than frames held together with nuts and bolts.

2. HIGH PRESSURE PUMP Hotsy manufactures its own pumps, with a 7-year warranty on the oil end of the Hotsy pump as well as a lifetime warranty on the brass manifold.

3. BELTS High-grade, notched belts operate cooler and have added surface area to prevent slippage.

4. PULLEYS Hotsy cast iron pulleys are sturdy and easy to adjust.

5. VIBRATION DAMPENING Mounting plates reduce engine vibration and thus extend the life of the unit.

6. MOTOR Hotsy only uses name brand motors and engines—Honda, Subaru, Vanguard, and Baldor.

7. HEATING COIL Hotsy has 11 different coils which are sized to come to temperature faster based on the flow rate (gallons per minute) of the machine. The upright heating coil is also more fuel efficient than horizontal coils. 5-year warranty.

8. COMBUSTION CHAMBER Hotsy combustion chambers are extra-efficient as they vent heat upwards through the vertical coil.

9. THERMOSTAT Hotsy pressure washers use thermostats for convenience in adjusting the temperature. This saves fuel without compromising cleaning power.

The Hotsy Advantage

Hotsy-designed triplex pumps carry a 7-Year warranty

10. TRANSPARENT PLASTIC BOWL FUEL FILTER Hotsy's transparent plastic bowl fuel filter allows the operator to see and remove any sediment or water in the fuel to protect the burner.

11. ROCKER SWITCHES Hotsy uses low-voltage rocker switches, which are more reliable and less expensive to service than combination barrel switches.

12. POWDER COATED PAINT SURFACES All metal surfaces are phosphatized, then powder coated to ensure excellent paint adherence, protection and longevity.

13. POLYETHYLENE FUEL TANKS Hotsy's cross linked polyethylene fuel tanks will not rust, decompose or draw condensation, providing a significantly longer life than competitors' metal tanks.

14. TRIGGER GUN The Hotsy trigger gun is ergonomically designed to prevent fatigue and allows for easy maintenance.

15. WAND All Hotsy wands are chrome plated for durability. Hot water units come with insulated wands.

16. HOSES Hotsy hoses are rated beyond the working pressure of the machine. They have a burst rating of four times the working pressure. Hotsy uses only reliable, long-lasting Class A rated pressure hoses.

Exceptional quality, outstanding reliability and advanced features make Hotsy the #1 brand in hot water pressure washers. One look at Hotsy tells you these are rugged, industrial-grade machines designed to give you long life, high productivity and superior cleaning power. Hot water pressure washers are powered by electricity, gasoline or diesel and heated with fuel oil, diesel, natural gas, propane or electricity.

We Stand Behind Our Product

The best warranties in the industry... all Hotsy heating coils carry a 5-year warranty. In addition, all Hotsy pressure washers are ETL-Certified to UL-1776 Standards and to CSA.
